I'm a results-driven front-end developer with a passion for transforming design concepts into code. With expertise in HTML5, CSS3, JavaScript, and responsive design, I craft visually captivating and user-centric websites that meet today's industry standards and deliver exceptional user experiences.

## Experience

### TechnoHack Internship

- Developed and launched a series of basic web applications in just one week.
- Projects included a countdown timer, a currency converter, and other small utilities.
- Demonstrated rapid problem-solving and development skills.

### Projects

- **Portfolio Website** -
  - Developed a personal portfolio website to showcase front-end development projects.
  - Utilized HTML, CSS, and JavaScript for design and functionality.
  - Ensured responsive design for optimal viewing on various devices.
- **Code Pen** -
  - Collaborated with a design team to redesign a mock e-commerce landing page.
  - Implemented responsive design principles and enhanced interactivity using JavaScript.
- **Rock, Paper, Scissors Web App** -
  - Created an interactive Rock, Paper, Scissors game using HTML, CSS, and JavaScript.
  - Demonstrated proficiency in DOM manipulation and user interface design.
- **Weather Web App** -
  - Developed a weather web application that fetches real-time weather data from a public API.
  - Utilized JavaScript to display weather conditions and forecasts.

## Certification

- **UX Design Certificate** - Georgia Tech (Coursera)
- **Version Control** - META (Coursera)
- **Introduction to Front-End** - META (Coursera)
- **JavaScript Algorithms and Data Structures Certification** - FreeCodeCamp
- **HTML and CSS** - META (Coursera)
- **Programming in JavaScript** - META (Coursera)
